STATE OF MARYLAND,

OFFICE OF THE STATE BOARD OF EDUCATION,

Baltimore, January 15, 1883.

To His Excellency, WM. T. HAMILTON,

Governor of Maryland.

SIR: I have the honor to transmit to you the Annual Report of the State Board of Education for the school year ending July 31, 1882, and the fiscal year ending September 30, 1882, with accompanying documents, as required by law. Very respectfully,

Your obedient servant,

M. A. NEWELL,

Secretary.

REPORT

—OF THE—

STATE BOARD OF EDUCATION.

The following summary, in connection with the accompanying tables, exhibits, in a condensed form, the most important facts connected with the administration of the public school system of the State, including the city of Baltimore, for the school year ending July 31st and the fiscal year ending September 30, 1882, so far as such facts can be presented in figures:—

Number of schools in Baltimore city.....	121	
" " " " the counties	1,937	
Total....		2,058
Being an increase in 1882 of.....19		
Number of different pupils, city..... ...	48,277	
" " " " counties	111,668	
Total		159,945
Being an increase in 1882 of...1,036		
Highest number enrolled in one term, city.	35.649	
" " " " " " counties	95,407	
Total		131,056
Being an increase in 1882 of...4,149		
Average number in daily attendance, city..	29,178	
" " " " " counties	54,011	
Total		83,189
Being an increase in 1882 of...3,450		
Number of teachers, city.....	826	
" " " counties	2,371	
Total		3,197
Being an increase in 1882 of.....17		
Number of months schools were open, city.	10	
" " " " " " counties	8.9	
Average for the State.....		9.35

Amount paid for teachers' salaries, city....$	526,099 96	
" " " " " counties	670,458 74	
Total.....		$1,196,558 70
Being an increase in 1882 of $34,129 22		
Amount paid for building, repairing and furnishing school-houses, city..... $	85,095 51	
Amount paid for building, repairing and furnishing school-houses, counties.....	105,663 24	
Total.....		$ 190,758 75
Being an increase in 1882 of $16,074.78		
Amount paid for books and stationery, city.$	24,669 66	
" " " " " " counties	50,097 22	
Total.....		$ 74,766 88
Being a decrease in 1882 of $5,570.89		
Amount paid for rent, fuel and incidentals, city.....$	53,175 89	
Amount paid for rent, fuel and incidentals, counties.....	47,284 32	
Total.....		$ 100,460 21
Being an increase in 1882 of $860.91		
Total expenses for Public School purposes, city.....$	692,440 39	
Total expenses for Public School purposes, counties.....	959,468 28	
Total.....		$1,651,908 67
Being an increase in 1882 of $47,327.90		

Of the total expenditures by the city—

The current expenses of white schools amounted to	$567,165 96
" " " " colored " "	62,834 04
The expenditure for building and repairs was	62,440 39

Excluding the city of Baltimore, the county schools show the following results:—

Number of schools	1,963	
Increase		44
Total number of scholars enrolled.....	111,668	
Decrease...		193
Highest number enrolled in one term.....	95,407	
Increase.....		4,130
Average number enrolled.....	82,747	
Increase.....		345

Average number in daily attendance.....	54,011	
Increase.....		3,696
No. of teachers (including assistants), men.	1,177	
" " " " women	1,204	
Total	2,381	
Increase		15
Average number of months schools were open	8.9	
Amount received from State as School Tax, Free School Fund and Academic Donation	$ 379,174 80	
Increase		$ 41,040 36
Amount received from appropriation to colored schools	$ 79,214 05	
Decrease		$ 227 51
Amount received from county tax.	$ 397,821 53	
Increase		$ 8,580 78
Amount paid for teachers' salaries.	$ 670,458 74	
Increase		$ 15,110 82
Amount paid for building, repairing and furnishing school-houses	$ 105,663 24	
Increase		$ 17,094 53
Amount paid for books and stationery.....	$ 50,097 22	
Increase.....		$ 5,235 33
Amount paid for supervision and office expenses	$ 42,307 21	
Increase.....		$ 2,169 13
Amount paid for incidental expenses, including fuel and rent.....	$ 47,284 32	
Increase		$ 933 37
Amount paid for interest.....	$ 4,117 08	
Decrease.....		$ 156 54
Amount paid for miscellaneous expenses..	$ 8,453 42	
Increase		$ 1,205 17
Amount of indebtedness paid.....	$ 31,087 05	
Decrease.		$ 4,783 25
Total expenditure for Public School purposes in the counties	$ 959,468 28	

The items of expenditure which show an increase are:

Teachers' salaries.....	$ 15,110 82	
Building, repairs, &c	17,094 53	
Books and stationery.....	5,235 33	
Supervision and office expenses.....	2,169 13	
Incidentals, fuel and rent	933 37	
Miscellaneous.	1,205 17	
		$ 41,748 35

The items which show a decrease are :

Interest	$ 156 54	
Indebtedness paid	4,783 25	
		$ 4,939 79
Showing a net increase of expenditure in 1882 of		$ 36,808 56

COUNTY REPORTS.

The County Reports printed herewith, with but slight abbreviation, exhibit in detail the statistical and financial condition of every school in the State. These reports are made out mainly from the quarterly reports of the teachers ; and as the teachers' reports have all been attested by oath or affirmation, the substantial accuracy is unquestionable. We thus know, beyond doubt, the number of pupils enrolled in each school, term by term, the average attendance, and the cost of each school under the several heads of teachers' salaries, fuel, repairs and incidental expenses.

Two points will arrest the attention of a careful reader of these reports.

SMALL SALARIES.

1. There is a number of schools in which the teacher receives a salary of less than $300 a year : and in which, necessarily, the ranks must be recruited from among those who have the minimum of preparation for their work ; for it may be assumed that no one, who has spent time and money in learning how to teach, will be willing to work for less than three hundred dollars a year. It is possible that at present, under peculiar circumstances, teachers can be found to do fair work at unfair rates, but where are the future teachers to come from ? A wise farmer cultivates his land as cheaply as he can, but he never forgets that he must raise a crop next year as well as this.

SMALL SCHOOLS.

2. There is a number of schools showing a small enroll-

ment and a very small average attendance. In a single county there may be counted twenty-one schools, in which the average daily attendance for two, three, or four successive terms lies between *one* and eight. The law says: "Whenever the average attendance in any school for any two consecutive terms is less than ten pupils, then the said school may be closed by the Board of County School Commissioners; *provided*, that the Board of District School Trustees may keep the school open, in part, at the expense of the district, and shall receive their proportion of the school fund for said school, rating a full school at twenty scholars." The closing of a school is an unpopular movement, and School Commissioners are reluctant to resort to it. The law suggests an alternative. When a teacher is appointed to one of these small schools, the contract might state that he should have full salary for the first term, and for the succeeding terms only as many twentieths of a full salary as might correspond to the number of pupils in average attendance, if the attendance should fall below ten. Another suggestion may be worth considering. A school, which, during the last year, averaged less than ten pupils, might be opened for one term only; between ten and fifteen, two terms; between fifteen and twenty, three terms. In this way one teacher might supply two or more schools.

NON-ATTENDANCE.

In an adjoining State the principal teacher in every school district is required to make, once a year, an enumeration of all the children in the district of school-going age. This brings the teacher officially into direct intercourse with all the parents and gives him an opportunity to explain to those who are careless and indifferent the advantages which their children are losing by non-attendance at school. In some districts in the State referred to, the teachers report not merely the fact but the cause of the non-attendance. Minute information of this kind is urgently needed in our own State; we can-

not be said to have performed our whole duty when we have merely opened the schools ; to provide the means of education does not necessarily educate ; and before we try compulsion it would be well to try what invitation and encouragement will accomplish. At the very least the tax payers of the State have a right to know what proportion of the children are actually receiving the benefits of a common school education. At present it is not easy to see how this important information can be obtained (beyond the limits of the city of Baltimore) except through the agency of the teachers; and though the enumeration of children not going to school would add to their labors, it is believed they would cheerfully undertake it, if called upon, in consideration of the great advantages that would result.

MORE SCHOOL HOUSES.

However small may be the attendance at many schools there is always a demand for a new school house.—Parents who have children to send to school want to have the school house near them and yet not too near them. But an increase of the number of schools, without a corresponding increase in the school fund, is an injury to every school in the county. The income being barely sufficient to support the schools now in operation, every application for a new school is in effect a demand for an increase in the county school tax. There is no economy in low priced schools. In education, as in other things, it is only the good that can be called cheap. It should be the object of the County School Boards to limit the number of schools to the proportions assigned by law,—one school to each district of four miles square; and by paying liberal salaries and erecting comfortable houses, to have a small number of good schools rather than a large number of indifferent ones. This applies specially to districts where the population is sparse. But the same policy holds good in populous districts. Here, in place of two or three independent

schools, we ought to have, and we generally do have, one graded school with a principal and several assistants. It may be noticed here that although the principal of a graded school is appointed by the District Trustees, the appointment of assistants belongs to the Board of County School Commissioners.

UNIFORM SCHOOL CURRICULUM.

The uniform schedule of study issued by the State Board of Education for the use of all the District Schools of the State has been in operation for the last ten years, and has been found of great assistance to pupils, teachers and superintendents. Wherever it has been faithfully carried out it has promoted in a marked degree the efficiency of the public school system. Indeed the comparative excellence of the schools in any county may be fairly inferred from the strictness with which the details of the schedule have been observed. In several counties the Examiner makes out annually a set of questions corresponding to each grade, and forwards a copy to every teacher, with directions as to the mode of using the questions in the examination of the pupils. When the examinations are finished the written answers are examined by the teacher, marked according to a fixed scale, and preserved for future reference. A record of the marks is sent to the County School Board. This practice has already exerted a beneficial influence in the counties where it has been adopted; and the results would be still better if a uniform set of questions could be sent to every school district in the State.

EXAMINATIONS.

Well arranged and honestly conducted examinations are a stimulus and a help to both teachers and pupils; and they afford the best available test of the proficiency of a school; but like sharp edge tools they must be used with skill and caution, or they may do injury. It requires the exercise of a sound judgment to conduct an examination properly; and it needs both sound judgment

and long experience to enable one to draw from the results of an examination the right inferences. The examination merely feels the pulse; the skill and experience of the physician are needed to diagnose the case and prescribe the remedies.

The usual result of a systematic and continuous course of examinations is to direct the whole current of teaching-energy into the artificial current thus created. That which will count on examination day is sure to be taught; that which will not count, however necessary it may be for other reasons, is as sure to be neglected. It matters not what the "Rules and Regulations" may require; they can be evaded: the examination is an automatic regulator which cannot be tampered with, and which always makes itself felt. The teacher keeps his eye upon it, as the engineer does upon the steam-gauge. He cannot afford to teach a *subject*, because he knows the examination will be taken from a *book*, and any piece of knowledge not in the book does not count, He cannot afford to give collateral information, however interesting and however necessary, because he knows it will not be called for. His reputation as a teacher depends on the number of pupils he can "pass"; and the number he can "pass" depends on the accuracy of his forecast of the course of the examination and the closeness with which he confines himself and his pupils to "what will count." The ingenuity of the teacher is thus misdirected to the task of ascertaining the probable line of the examination; and the energy of the pupil is wasted in the effort to obtain a temporary victory when it might, if properly directed, have led to a permanent conquest.

A well arranged and wisely directed course of study, if honestly and boldly pursued, without any other end in view than the pleasure and profit which study itself affords, results in the symmetrical development of all the intellectual powers in accordance with the age and ability of the learner; but study for examination, as the end and purpose of study, is narrowing, demoralizing

and hardening in its effects. It weakens the other mental powers by throwing the strain chiefly on the memory; and it tends to spoil even the memory, by substituting for the natural power of conversation and recollection, a temporary and artificial memory, like a "limited" railway ticket, good only till examination day. It deprives the learner of the only natural and permanent inducement to study—the pleasure which he should feel in the right exercise of his faculties and in conscious growth in knowledge,—and substitutes a low, artificial and temporary motive, the desire of promotion. Those therefore who virtually control a system of public schools by means of the examinations which they prescribe should use due diligence to ensure examinations of the right kind,—such as will test the powers of observation, reflexion, reasoning and expression, and not merely the responsiveness of a temporary and artificial memory.

What has been said above in reference to examinations held once, twice or four times a year for the purpose of ascertaining the pupils who should be promoted. applies with but slight change to those daily examinations which we call recitations. When the making of perfect recitations is held out as the great aim of teachers and pupils, the first downward step has been taken, and the descent is short and easy to the intellectual "slough of despond." The teacher is degraded from his high office of instructor, guide and friend, and becomes a mere hearer of lessons and recorder of marks; "the like of whom will in a subsequent generation be manufactured at Nuremberg out of wood and leather." The pupil ceases to be an honest inquirer after knowledge, struggling after the light, and gaining the strength which is born of struggle, and becomes a mere sayer of lessons, a kind of human barrel-organ, out of which certain tunes can be ground by due rotation of the wheel. In such schools, the energy of action which the child brought with him at his first entrance is changed into energy of position, which

remains latent until he is released from school and enters upon the active duties of life.

SCHOOL-BOOKS.

The defects of schools of this kind are perpetuated and exaggerated by the kind of books employed and by the use that is made of them. A good school-book is rightly called a "text-book," that is a book of texts to be memorized, and to which the teacher is to add the sermons and explanations. But our manufacturers of school-books assume that the teacher is incapable of explaining anything; that he is a "dummy," a lay figure whose principal office is to display the fitness and beauty of the school-book; and therefore they have given us, not books of "texts," but books of sermons, and the teacher falls in with the plan and insists on the sermons being memorized word for word. In vain the teacher is reminded that he operated on this treadmill himself, when a child, with much fatigue and little profit; in vain he is told that he could not, now in his mature years, recite the text of even the smallest of the three volumes of the Geographical Series with which he insists on cramming his pupils; in vain it is argued that nine-tenths of all this cram will have disappeared before the learner has gone out of his teens, and "like the baseless fabric of a vision" will have left but "a wreck behind"; in vain it is proved that even if it could be recalled, three-fourths of it would be found about as useful as warming-pans at the equator, or skates in Cuba:—the force of habit, the influence of the machine still urges him on; and the old mill-horse complacently paces the weary mortal round regardless whether the hopper is fed with wheat or saw-dust. Fortunately our schools are not all of this description, though there are more of them than we should like to acknowledge; and the number is growing smaller, year by year. There are all around us, standing conspicuous like beacon-lights, at once a guide and a warning, schools of a very different

kind, and their number is increasing, year by year. Referring to the origin and growth of these better schools, Assistant Superintendent Edwards, of Baltimore city, well says in his Report for this year: *

THE NEW EDUCATION.

"Time and the ceaseless march of events which have changed so much the fashion of our outward lives have not spared the primary schools of the country. The genii at whose touch the steam engine, the cotton gin, the railroad, the sewing-machine, the telegraph and the electric light sprang into existence, have begun to wave their wands over our primary schools, and one by one, as they feel the magic touch, they rise from their long slumbers, and begin a new life, full of vigor, grace and beauty. It is next to impossible to describe intelligibly and briefly the change that is going on, and it is difficult to predict the consequences that will in a few years result from the 'new education.' The traditional order of studies—Alphabet, Spelling, Reading, Writing—has been completely reversed, and the new order is Writing, Reading, Spelling. In place of learning to read through the medium of spelling, children are taught to read and spell through the medium of writing; and the alphabet which used to occupy the first three months of a child's school life is left to take care of itself. Drawing and Music, the "extras" of the boarding-school, are made fundamental exercises in the new primary schools. Composition which used to be postponed to the High School course is begun in the first year and continued through every year of school life. Spelling, which was once the "grand gymnastic" of the schools for the first seven years, is now reduced to a subordinate position. It is considered sufficient that a child should be able to spell all the words he can use. To learn more is thought

* As the school year in Baltimore does not end till December 31st, we are indebted to the courtesy of the Secretary of the School Board, H. M. Cowles, Esq., and the Superintendents, Messrs. Wise and Edwards, for statistical and other information in advance of the printing of the official School Report of the city.

to be a waste of time, for the ability to spell other words is expected to come with the knowledge of the words themselves, and the knowledge of the words comes with more extensive reading. Thus reading is made the means of teaching spelling, instead of using spelling as in former days, as a preparation for reading. The current of change seems to set in the direction of a knowledge of *things* rather than of words; and in addition to the three R's which were once supposed to constitute the sum and substance of elementary knowledge, we have three other things to teach: to observe closely, to think justly, and to express thought correctly. The "Quincy System," so-called, has these three important elements of education constantly in view; and though there is nothing absolutely new either in the theory or the practice, for all good teachers have used them in whole or in part, yet Col. Parker deserves credit for having made them conspicuous by making them successful on a large scale."

The means and agencies for the improvement of our schools, as recognized by law are:

1. The examination of teachers.
2. The visitation of schools by the County Examiner.
3. State, County and District Associations of Teachers.
4. Teachers' Institutes.
5. The State Normal School.

EXAMINATIONS OF TEACHERS.

No person can be legally employed and paid as Teacher, Assistant Teacher or Substitute, until he has been examined by the County Examiner or by the Principal of the State Normal School, and certified as duly qualified. The certificate shows on its face the branches on which the candidate was examined and his "per centage" in each branch. The examinations are required to be in writing as far as possible, and the work is preserved for reference. This test would seem sufficient to exclude all grossly ignorant applicants, and

yet some of this kind do occasionally creep in. No one really imagines that a knowledge of the branches taught is any guarantee of a person's ability to teach, any more than a book knowledge of the properties of water is a test of a person's ability to swim; yet no one doubts that, in making choice of a teacher, we had better choose from among those who know than from those who do not know the subjects to be taught. It would not be carrying this principle too far to say that in selecting a teacher from among a number more or less qualified in literary attainments, it would generally be safer, to prefer the better qualified to the others. Yet no recognition of this principle obtains among those who have the appointment of teachers; an applicant with the minimum of literary qualification usually stands as good a chance of getting a school as the one who has the maximum. Learning like honesty, *laudatur et alget.* It sometimes happens that while there are several unexceptionable candidates on the list unemployed, the County Examiner is importuned to give a "special" examination to another applicant, and if this other passes with even a minimum record, he gets the place. "Special" examinations should be abolished. There is no more need of accidental teachers than of accidental doctors or druggists. Only those should be employed who have counted the cost and made due preparation beforehand. If teachers of known merit are prevented by sickness or accident from attending the regular annual examination, their certificates might, without impropriety, be extended, without examination for a limited period.

Teachers' certificates are divided, by law, into two grades, first and second, according to the subjects in which the teacher has been examined, those of the first grade including book keeping, algebra and natural philosophy, in addition to the branches required for a second grade certificate; and each grade has been sub-

divided by the County Examiner into two or more classes, according to the the *per centage* marked against the several studies. It would be better to adhere to the principle of scholarship in the *grades* only; and to mark the *class* according to the ability displayed by the teacher in the instruction, government and general management of his school. While it cannot be said that too much attention has been given to the scholastic preparation of teachers, yet far too little importance has hitherto been attached to the purely professional part of his qualification. It is only reasonable that the certificate, which guarantees to its possessor a certain amount of school book learning, should also indicate his power as a teacher and governor.

It has been suggested that the value of a teacher's certificate would be more accurately appreciated if there was a uniform standard of examination in all the counties. This, however, could only be reached by the State Board's issuing a set of examination papers every year, and forwarding them, under seal, to the several County Examiners with instructions to use them on a certain day, which must be the same in all the counties. Even then we should fail of the desired uniformity, unless there was a uniform standard of marking adopted by the various examiners, and this would be difficult, if not impossible.

VISITATION OF SCHOOLS.

Much can be done for the encouragement of teachers and the efficiency of the schools by the County Examiner in his regular official visits. If he knows something of the art of teaching he can guide those who are without experience. If he is, as he ought to be, an expert, well read in the theory and well versed in the practice of teaching, he can be of great service even to teachers of long standing. The law presumes that all the examiners are men of this kind, and it requires them to devote their whole time to the duties of their office. As a matter of fact, the majority of these officers

are practical teachers, experts in their profession, able and willing to aid those who have had less experience, and cheerfully devoting their whole time to the public service. It has been well said, "As is the teacher so is the school"; it may as truly be added, "And as is the superintendent so is the teacher." When *all* the County Examiners are equal to the best now in office, then will the schools of Maryland be equal to the best in the country. It will be a sad day for the State if this office should ever come to be regarded as part of the spoils of a political victory; or to be filled from any other consideration than the personal and professional fitness of the man for the work. It takes a novice at least a year, and in some cases two years, to learn the details of the business; to turn out a faithful officer just when he has learned the duties of his office, in order merely that another man may have his salary, is a wrong done to those who are incapable of defending themselves—the children of the State. It is difficult to over-estimate the value of a competent and conscientious examiner. Were the office abolished the schools would lose one half their efficiency. Could the skill and energy of the examiner be increased, the usefulness and success of the schools would be increased in like proportion. Without judicious, minute and continuous supervision—which does not mean faultfinding, but watching, encouraging, guiding, stimulating—one half the schools would fall into a comatose state. There are not wanting cases where, even in the judgment of charity, the superintendence is nominal, superficial, intermittent and ineffective; and the result is clearly seen in dull, sleepy, lifeless, half starved schools. If any part of the public school system needs strengthening it is the examinership. Whatever money is needed to obtain the services of honest, active, experienced and enthusiastic examiners should be given freely, and it will be repaid with interest, in largely increased efficiency in every department of the public school system.

TEACHERS' ASSOCIATIONS.

State, County, and District Associations are authorized and recommended by law as important agents for the improvement of teachers and the increase of professional spirit; and all have been used during the past year with a success proportioned to the amount of energy displayed. The last State Association was held at Cumberland in August. It was well attended by representative teachers from all sections of the State, as well as by School Commissioners and County Examiners. The evening sessions were also attended by the citizens of Cumberland, who showed marked interest in the proceedings, and by their hospitable attentions made the occasion one to be long and pleasantly remembered. The papers read were appropriate, interesting and instructive; the discussions which followed were searching, animated, and often truly eloquent. One of the marked features of the meeting was an address by Hon. J. Randolph Tucker of Virginia.

County and District Associations have also been held in several counties and always with good results. Here, too, the hand of the Examiner can often be clearly traced. When he has no time or inclination for the work, the association is not apt to flourish.

TEACHERS' INSTITUTES.

But chief among the temporary expedients for the increase of pedagogic knowledge stands the Teachers' Institute. The "Associations" are voluntary organizations, and are valuable because being voluntary they furnish a fair indication of the warmth, or the absence, of professional feeling. The teachers' institute is held by requirement of law, and is the most direct and efficient agency by which the mass of teachers can be reached. Comparatively few read pedagogic literature, few have the benefit of normal training, few have the ability and the inclination to travel to a distant point to meet fellow teachers in an Association; but all can go to the Insti-

tute which is brought home almost to their doors. Unfortunately, the school authorities are not always convinced of the necessity of such meetings; and it has not been thought advisable to hold an Institute without the hearty approbation of County School Boards; but wherever the Institute has been held it has fully realized our expectations. In no part of the country have Teachers' Institutes been conducted with more zeal, regularity and sound judgment than in Pennsylvania, and the testimony of the State Superintendent, Hon. E. E. Higbee, is worth placing on record, for our encouragement. "The county institutes form a very significant part of the school work of the State and are growing from year to year. No factor is more important or serviceable in the way of awakening and deepening interest in educational affairs. . . . . They challenge attention and arouse the thought of whole communities and concentrate the same upon the public school work. They serve also to keep vigorous among the teachers a sense of their calling,—that *esprit de corps*, which is felt to be so necessary in all professional life. To this must be added the special benefits which the teachers gain from skillful educators who are present at the institute with this end in view." *Pennsylvania School Report*, 1882.

STATE NORMAL SCHOOL.

The great permanent agency for the preparation and training of teachers and for elevating the standard of the profession throughout the State is the Normal School. What the teacher is to his school, what the Examiner is to his county, that is the Normal School to the State. It gives tone, color and life to all the schools in the system. It sets the fashion in school economy, in methods of instruction and in modes of government. It is the highest authority within the State on all educational theories and practices within the sphere of the public school system. Beyond the State and beyond the limits of the United States it represents the progress which Maryland has made in public education, and indicates the path in

which she is travelling and the goal which she expects to reach. The direct influence of the school, though considerable, is limited to the teachers who have received normal training—about one in six of the public school teachers of the State. But the indirect influence exerted through the alumni, through the Faculty, through the County Examiners, through the County School Commissioners, through occasional visitors, is powerful and extensive and is spreading from year to year. The school has had many advantages. For seventeen years it has been supported by the Legislature, always steadily, and most of the time liberally. The opposition which it met with in '78 and '80 did not represent public opinion; and was directed against the Head of the School, not against the institution itself. The popularity of the school was not injured, and seemed rather to be increased, by the unreasonable opposition of a few mistaken individuals. From the first organization, when eleven anxious pupils gathered round a no less anxious master in a rented hall, till to-day when three hundred pupils meet twelve teachers in one of the most comfortable and best appointed school-houses in the country, there has been no change of administration or of plan. The Principal has been at his post for seventeen years, the Vice Principal for sixteen years, and two other principal teachers fifteen and ten years respectively. The manuscript which was presented to the State Superintendent in 1865 as the plan of intended operations still serves as a general guide; the growth of the school has not made any change in its methods or designs. The State Board of Education as Trustees of the School has always warmly seconded and encouraged the efforts of the Faculty. Every member of the Legislature who has taken pains to investigate the condition of the school has become a warm advocate and friend; and to-day we have not within our borders any educational institution more useful, more economical or more essential to the best interests of the Commonwealth than the Maryland State Normal School. Its continuous

growth may make it necessary to appeal to the Legislature for further assistance, and there is no reason to doubt that the appeal, when made, will, like other similar appeals, be liberally responded to.

NORMAL SCHOOL FOR COLORED TEACHERS.

The Trustees of the "Baltimore Normal School for the Education of Colored Teachers" report the school as in a very flourishing condition, employing six teachers and having on the roll 142 pupils. The school library contains over 1100 volumes of well assorted books, all in good order and constantly used by the scholars. Over 150 of the pupils of the school have been employed at different times and in various localities in Maryland, Virginia, and North Carolina as teachers. Their record as to behavior and industry has been exceptionally good. The school has an annual appropriation from the State of $2,000, and the results from this expenditure are more satisfactory than could have been expected.

HIGH SCHOOLS.

There are High Schools or High School Departments in the counties of Allegany, Baltimore, Cecil, Dorchester, Harford, Kent, Queen Anne, Somerset, Talbot, Washington, Wicomico and Worcester. As the law does not define what constitutes a High School, although it recognizes them as part of the public school system,* the course of study, as may be expected, varies greatly in the different counties. In some, the High School furnishes adequate preparation in English, Classics and Mathematics for admission to college; in others the course is only the

* The following are the sections of the school law under which High Schools are or may be established: Chap. XVII, Sec. 1, "It shall be the duty of the Board of County School Commissioners, when any election district, or any contiguous election districts shall present a building for a High School in said district or districts to the Board of County School Commissioners, to accept the same, (if in the judgment of the board there is necessity therefor) and thereafter provide for maintenance of a High School in said district or districts, and the salaries of teachers out of the general school fund. Sec. 2, If the High School be established by a district or districts, the Board of County School Commissioners shall appoint three persons, who shall constitute a Board of High School Commissioners, and exercise like authority over said school as hereinbefore provided for Boards of District School Trustees; but High Schools established by the county shall be under the direct control of the Board of County School Commissioners.

course of the district school extended to a seventh, eight and ninth grade—all these schools are popular, each in its own neighborhood; but citizens living remote from the High School are not always satisfied to be deprived of advantages which others enjoy. With our sparse population the High School must necessarily be confined to places where there is a neighborhood demand for it; it is, in fact, a local institution. The direct influence of the High School is thus limited to the small area which supports it; but indirectly it extends over the county and may be felt throughout the State. It shows what the public school system at its best is capable of accomplishing. It tends to create a scholarly body of men and women, to whom the interests of the public schools may afterwards be safely intrusted. It supplies leaders to the grand army of which the district school furnishes the rank and file;—generals in full sympathy with the private soldiers, a sympathy which is often wanting in those educated at expensive private institutions of learning. The High Schools not only send recruits to the State Normal School, the Colleges and the University, but also give to many young persons the only preparation for teaching that they receive. It is highly creditable to these schools that even those whose curriculum is not extensive have sent into the field a number of excellent teachers. They should, therefore, be sustained to an extent corresponding to our means and our needs. Compared with schools of lower grade they cost, in some instances, rather more and in others rather less; but they are worth all they cost.—While in one aspect they may be looked on as educational luxuries, in another they may be considered as necessities. The public schools have absorbed almost all the private schools beyond the limits of the city of Baltimore, (boarding schools excepted) and it is necessary that they should fill the place of those schools which they have caused to disappear by making them unprofitable. They ought to supply a grade of educa-

tion good enough for all. The old argument, as illogical as it is old, that those who can afford it should send their children to private schools for a superior education is inapplicable for two reasons: First, because in most places such private schools have no existence, and, secondly, because if they were in existence they could not give as good an education as the public schools.—Whatever other advantages may be claimed for select schools, experience has proved that so far as education is concerned a well managed public school is far superior even to the most "select" day schools.

CITY AND COUNTRY SCHOOLS.

It is generally supposed that large schools, with a principal and several assistants, have a great advantage over the small country schools, where one teacher has to instruct forty children in perhaps six different grades; and it is said that we cannot expect as good results in the latter case as in the former. The advantage, if there be any, is by no means so great as is sometimes imagined; and practically we find as good work done in the small school as in the large. The uniform grading of our district schools has raised them very nearly to the level of the best city schools. The real argument in favor of the large school is not that it is so much better, but that it is so much cheaper, and at the same time easier on the teachers. The intimate knowledge which the teacher in a school of thirty or forty scholars acquires of each one of his pupils, his personal association with them as individuals, and not *en masse*, the necessity that the pupils should do a great deal for themselves without the direct intervention or supervision of the teacher, the opportunities which they have of learning from one another, the free intercourse of the younger and the older, the more natural relations existing among the members of the school community—all these things tend to counterbalance the benefits arising from a more minute subdivision of labor, a more systematic plan

of operations, and a more constant supervision. The Faculty of the State Normal School find, as a matter of fact, that the most promising students, though not the most advanced scholars, come from our good country schools.

THE ROD IN SCHOOL.

Complaint having been made by a parent that his son had been unmercifully whipped by his teacher for missing lessons, the Board took into consideration not only the case presented but the general question of "corporal punishment" in school—and it is desirable that the conclusions arrived at should be made known to the teachers of the State. The members of the Board regard those schools as best managed in which the rod is not required; and they look forward with hope to a day not far distant when the teachers' switch shall be laid up in the museum of curiosities alongside of the "boot," the "thumbscrew" and other instruments of torture, once thought essential to the administration of justice, now happily gone out of fashion. But under existing circumstances and especially in consideration of the faulty home-training of many children the Board does not think that the abolition of corporal punishment *by law* would promote the welfare of the schools. The Board, however, is of the opinion that for "missed lessons" the rod is not the proper remedy; and hereafter the Board will not sustain a teacher who resorts to it for such a purpose. The reasons will readily occur to any unprejudiced thinker.

1st. The teacher cannot know how much a pupil who has missed his lesson is to blame. The failure may be caused by wilful neglect, by unintentional neglect, by temporary forgetfulness, by defective intellect or other causes beyond his control. The teacher can only guess at the cause and he may guess wrong.

2d. Two pupils may miss the same lesson, and if they do not receive the same punishment the teacher is charged with partiality; yet one of the pupils may have been

willing and unable to learn it, the other able and unwilling.

3d. The use of the rod for the purpose mentioned can only be justified by the false assumption that the teacher's principal duty is to exact an accurate recitation of prescribed lessons. It is hardly possible to form a more inadequate conception of a teacher's office. It is no part of a teacher's duty to compel a pupil to carry away with him every day a certain allotted portion of book-learning. His office is rather to create a love of knowledge, to stimulate curiosity, to set the mind at work on interesting objects, and to form such habits of intellectual activity as will prevent his education from being "finished" when the pupil leaves school. To repress the natural desire of knowledge is the greatest intellectual injury that a teacher can inflict on a pupil. No amount of ready-made information can make up for the want of a love of learning. The rod may and often does ensure good recitations; but of what advantage are good recitations to one who is forced to look forward to the ending of his school-days as a happy release from books and studies and teachers?

4th. The use of the rod for the purpose of enforcing good recitations is usually associated with methods of instruction which it is not desirable to perpetuate There are still left, for our warning, in Maryland and elsewhere, many primitive schools conducted by honest, old fashioned teachers, or rather schoolmasters, for they teach next to nothing The pupils memorize lessons and recite them; the master hears recitations and punishes delinquents. Six hours of every school-day are spent in these monotonous exercises. There is no teaching and very little learning, but the hours pass by. There is no awakening of the intellect by "thought kindling at the living fire of thought"; there is indeed no communication between master and scholar, except through the medium of a book or a stick. If the stick were taken away, then

Othello's occupation would indeed be gone. As long as such teachers can find employment so long will we have indifferent schools; but the people are becoming impatient and they will not much longer be tolerated. Teachers are in demand who will teach, and not merely hear lessons and inflict punishment.

5th. School should be made a pleasant place both to teachers and pupils, but it cannot be made pleasant if the infliction and the suffering of physical pain be a necessary part of the routine of every day.

FREE BOOKS.

The Constitution of Maryland guarantees to the citizens a "thorough and efficient system of FREE public schools." How can a school be "free" if a pupil has to pay for admission? It matters not whether the sum demanded be large or small, the school cannot be "free" if any charge is made. The price of admission is indeed small, varying from fifty cents to a dollar a Term; and it is distinctly stated that the charge is for the use of books; but the same principle that justifies the charge of one dollar would justify a charge of ten dollars; and if we may charge for the use of books we may also charge for the use of black-boards, or desks, or fuel, or stoves. The truth is that a free school should include everything that is necessary for the conduct of the school; and it would be just as reasonable to require a pupil to carry a stick of wood to school as a spelling-book. We do not ignore the fact that no pupil need be excluded from school for his inability to buy school-books or pay the book fee. The Trustees can exempt all indigent pupils from payment, and furnish them with the necessary books without cost. But it is very undesirable to set up such a class-division as "pay scholars" and "free scholars." There is no doubt that many who are able to pay evade it; and some who are unable to pay do not send their children to school for fear of having them classed as "indigent pupils." A school should be a pure democracy, without such unpleasant sugges-

tions as arise from the payment or non-payment of book-fees. It is not recommended that books should be given to pupils to carry home; but only that such books as are needed in school should be furnished by the School Board and kept in the school-house, in the same way as desks and black-boards and maps and stoves. Two great, though indirect, benefits would result from the adoption of free books. School-work would not be delayed by the failure of pupils to procure books in season; and teachers would be freed from the labor, annoyance, expense, and unpopularity caused by their being the agents for the collection of book-money.

JOHNS HOPKINS UNIVERSITY.

The Seventh Annual Report of the Johns Hopkins University contains a review of the work of the University for the last six years. It appears that the number of students enrolled during the year 1881–82 was 175, of whom 97 were residents of Maryland, 68 came from twenty-one other States of the Union, and ten from foreign countries. Among the students were 99 already graduated, coming from fifty-two colleges and universities; there were 45 matriculates or candidates for the degree of bachelor of arts, and there were 31 admitted as special students, to pursue courses of study for which they seemed fitted, without reference to graduation. The average daily attendance on eighty-three public lectures was one hundred and thirty-seven.

From the register of the University it appears that within the last six years 449 individuals have been enrolled as students, of whom 251 came from Maryland (including 204 from Baltimore); and 198 from thirty-five other States and countries. Of this number 275 persons pursued courses as graduate students, and 174 as collegiate students.

The number in attendance during the first academic year (1876–77) was 89, of whom 54 were graduate students; the number now in attendance is 201, of whom 120 are graduates.

The University has become a sort of national seminary for the training of teachers, over one hundred of those there taught having become professors and instructors in colleges, academies and schools. But this is not the only calling for which young men are prepared at the University. Seventy-eight are physicians and students of medicine; thirty-one are clergymen and students of theology; twenty-nine are lawyers and students of law; forty-three are engaged in business (as chemists, engineers, electricians, manufacturers, merchants, &c..) and a few have entered the scientific service of the Government of the United States.

Thus early has the University begun to take possession of the promised land. But little time has been spent on preliminary surveys. Land has been cleared, fences built, seed sown, and crops harvested already. The older colleges in Europe and America have for six years been intently watching the progress of the experiment, and now it is no longer an experiment; it is a success. Much work still remains to be done of a tentative kind; but the past is a guarantee of the future.

MARYLAND INSTITUTE.

The Schools of Art and Design of the "Maryland Institute for the Promotion of the Mechanic Arts" have made marked progress during the past year. The exhibition of students' work last June showed clearly the advance that had been made in work of different kinds, and especially in original designs for wall-papers and other manufactured goods. Very creditable work was also exhibited in the higher branches of art, drawing and painting from life and nature. In these departments students have been prepared for entering the highest schools of Art in Europe. A former student of the Institute, Mr. B. W. Clinedinst, now a student of "L'Ecole des Beaux Arts" in Paris, in returning his acknowledgments to the Principal for the admirable preparation which he had received, and which had enabled him to

enter without difficulty one of the most exclusive Art Schools in France, adds that the methods are the same as those pursued in Baltimore, though carried to a much higher point.

In the lower grades of art-work, applicable to industrial pursuits, many young women have learned in the Day School of the Institute the art of decorating pottery, which has become quite an important industry in Baltimore; and some of them are now working in the shops of the Chesapeake pottery in the Maryland Institute building. At this work they earn respectable wages in decorating Faience ware. The pottery shop belongs to Messrs. D. F. Haynes & Co , who have invested considerable capital in this business, which affords pleasant occupation and rumunerative wages to many young people who would otherwise be without congenial employment. Thus Art and Industry join hands for the promotion of the public good.

In the night schools the increased vigor of the administration has been rewarded by the increasing popularity of the schools which is shown by a large increase in the attendance. The young artisan finds that his surest way to promotion lies in a thorough knowledge of drawing—the basis of all mechanical arts. So the night schools are crowded beyond the limits of comfort, and additional rooms are filled as soon as they are fitted up. Numerous instances came to our knowledge of young men promoted from the bench to the office, from common workmen to foremen, and from lower to higher places as draughtsmen solely on account of the training they have received at these night schools of Design. The number at present in the schools is over seven hundred; the number of teachers employed is thirteen, under the general superintendence of the Principal, Professor Hugh Newell.

COLLEGES AND ACADEMIES.

Tables I and K give the statistics from which the general condition of the colleges and academies may be

inferred. The withdrawal of the State appropriation from the Agricultural College and the large decrease in the amount paid to St. John's have had a disheartening effect, yet both colleges have kept up their organization and are receiving students. St. John's College reports an accession of thirty students during the year—mostly in the Collegiate Department. The preparatory department has been entirely separated from the Collegiate, and the change is said to be a vast improvement. The rooms in both halls have been made thoroughly comfortable. The principal says: "I have never known so industrious and orderly a company of students, and our teaching has never been so satisfactory under my administration as during the present year."

CONGRESSIONAL AID TO EDUCATION.

In their last report the State Board gave a synopsis of the bill introduced into the Senate of the United States by Mr. Blair, of New Hampshire, to aid in the suppression of illiteracy by a liberal appropriation from the national treasury in support of common schools, viz:—Fifteen millions of dollars the first year, fourteen milions the second, thirteen millions the third, and so on for ten years and no longer, these amounts to be distributed among the several States and territories in proportion to the illiteracy as reported in the U. S. census of 1880. This bill is now before the Senate, with but little probability that it will be acted on this session; but if it does not pass, there can be little doubt but the next Congress will enact a bill of the same general import.—The argument in favor of such a bill may be briefly stated: 1. It is undeniably constitutional, Congress has exercised the same right ever since the beginning of the government. 2. The money is in the treasury and cannot be expended for a more worthy purpose. 3. There is urgent need of it. Even in Maryland after seventeen years of earnest labor, and the expenditure of over twenty millions of dollars for common school purposes, there are 134,488 persons over ten years of age who are

unable to read and write. 4. There is a strong popular demand for it in the South, which is generally, though not universally seconded in the North. The arguments on the other side are: 1. Herbert Spencer's theory that education lies outside of the function of government; that it is the duty of the head of the household to educate his family and that all aid or interference by the government is hurtful. But this argument is as valid against *all* public schools, State or municipal, as it is against Congressional aid to such schools. 2. The fear that the disbursement of large amounts of money for educational purposes would increase the centralizing power of the government, and might prove the entering wedge to destroy State systems and replace them by a national system. The political fear is as irrational as the doctrinaire theory. Fortunately we have a precedent showing how money may be expended in aid of State systems of public schools and without exciting political prejudices. The trustees of the Peabody Fund have marked out the plan on a small scale which the government could pursue on a larger scale. If no comprehensive measure can be passed at this session of Congress, would it not be possible to make an appropriation in aid of the Peabody Fund, to be expended by the same agent and on the same principles and methods.

CHANGES IN THE BOARD.

Mr. Wm. H. Harlan having resigned his position as Secretary of the School Board of Harford county, his resignation as a member of the State Board was necessarily though reluctantly accepted. Mr. Harlan was a very intelligent, active and useful member of the Board. His place was filled by the Governor's appointing Mr. Thos. C. Bruff, of Baltimore county, a gentleman who has been identified with public school affairs for the last fourteen years.

In conclusion the Board would congratulate the people of Maryland on another year of successful administration

of the public schools, and the hope that their permanent prosperity is sufficiently guaranteed by the firm hold which they have taken of popular favor.

(Signed.) JAS. T. WILLIAMS,
WILLIAM DALE,
E. H. BARTLETT,
THOS. C. BRUFF.

M. A. NEWELL, *Secretary.*

REPORTS

OF THE

SCHOOL COMMISSIONERS

OF

THE COUNTIES.

ALLEGANY COUNTY.

Professor M. A. Newell,

SIR: We herewith transmit our annual report. It will be seen that our schools were kept open nine months the past year instead of seven and half months as in the previous year, and nine additional teachers were employed.

Owing to the extension of the term and the increase in the number of teachers, the amount paid for teachers' salaries was necessarily increased from $36,203.81 the year previous, to $42,096.36 the past year.

Our schools are doing well, with a large attendance.

J. W. S. COCHRANE, *Secretary.* SAML. SONNEBORN, *President.*

ANNE ARUNDEL COUNTY.

RICHARD H. GREEN, *President.* WILLIAM HARWOOD, *Sec'y.*

ANNAPOLIS, November 15, 1882.

Professor M. A. Newell,

SIR: The Commissioners of Schools of Anne Arundel County herewith transmit their Annual Report.

Of the school-houses, five are not owned by the county but rented.

Several of the colored schools are taught in the churches of the colored people, which are but little adapted to this use. Our limited means will not allow us to build school-houses for them at present.

We have not built any school-houses within the year. The amount charged under the head of "Building School-houses," was the annual payment on the building some years since purchased in Annapolis which accommodated all our white schools, and payment of the money advanced by one of our liberal friends in the Fifth District for the erection of the school-house built there in the preceding year.

We are still cumbered with a part of our old debt, on account of which we issued certificates in the last year to the amount of seven thousand three hundred and seventy-nine dollars and ninety-seven cents ($7,379.97.)

Most of our school-houses are provided with good furniture and good blackboards. I have not noted them so as to state the exact number. Will endeavour to do so hereafter.

The annexed tables show what else we deem material to be reported at this time.

WILLIAM HARWOOD,
Secretary, &c.

ANNE ARUNDEL CO.—SUMMARY OF SCHOOL STATISTICS.

For Year Ending June 30, 1882.

BALTIMORE COUNTY.

DANIEL JENIFER, *President.* THOS. C. BRUFF, *Secretary.*

Professor M. A. Newell.

SIR: The Annual Report of the Schools of Baltimore county for the fiscal year ending September 30th, 1882, is hereby submitted.

The schools are in a prosperous condition—the majority being fully equipped with good furniture black boards, wall maps, charts, &c., and in charge of compepetent progressive teachers. Being thus provided with educational facilities the efficiency of the system must be promoted. One gratifying result is a large increase of pupils each year. They now enter the public schools because the character of instruction is not surpassed by any similar institutions in the State. The total number of pupils enrolled for the year is twelve thousand four hundred and twenty-five, an increase of six hundred and eighty-two over last year, and the average attendance is forty-nine per cent. of the enrollment, being an increase of over four per cent. In nearly every school visited the teachers complain of irregular attendance, and various means have been devised and discussed to remedy this evil. There are some children over whose actions the parent exercises little or no control, who are permitted to do as they please generally and can go to school or remain at home as inclination may dictate. Over this class the teacher can have some influence and may induce them to come to school by making the schoolroom cheerful and inviting and the methods of teaching attractive as well as instructive. But there is another class that no teacher can reach without the co-operation

of the parent. These are kept out of school from selfish motives—the boy to run errands or save a man's wages on the farm or in the shop, the girl to save hired help in the kitchen or household. In this way one-half or perhaps two-thirds of their childhood is occupied, and the remainder is of little value in acquiring even the simplest rudiments of a common school education. School life is the golden opportunity of youth, and parents make a great mistake in depriving their children of any of its advantages.

The increase in the cost of the schools over last year is $19,958.09, which is accounted for by the large increase of pupils, necessitating new school buildings, more teachers, additional books, &c. The items showing an increase are: Teachers' salaries, $7,902.85; building, $5,995.13; books and stationey, $3,012.10; furniture, $2,159.22; miscellaneous, $505.69; incidentals, $387.20: assistant examiner and attorney, $225.00; repairs, $198.05; fuel, $71.05. Items showing a decrease are: Office expenses, $427.90, and rent, $70.30. The running expenses of the schools, exclusive of buildings and school lots, which are permanent investments, are $145,083.24. Of this large sum teachers' salaries alone amount to more than seventy-five per cent. of the whole There was paid to principals of white schools $68,778.17, and to assistants $31,254.23: to principals of colored schools $9,232.17, making the average salary of principals of white schools $533.16, of assistants $411.23, and of colored principals $297.80. The cost per pupil based on the average enrollment is $16.36. For the year 1872 computed in the same way it was $17.05. Considering that since that date the salaries of teachers have advanced about twenty per cent. and all the equipments of the school-room have improved in the same proportion, this should be a satisfactory showing.

Petitions are filed asking for fifteen new houses to replace dilapidated buildings, barely tenantable. Unless the County Commissioners take this matter in hand and

render some assistance the School Board can do no more building, and continue the schools, as has been the custom ever since they were inaugurated, (with two exceptions,) the full time required by law. The school fund is derived from the following sources: County levy, $85,000, (all back levies are now settled and exhausted); State School tax, $38,059.16; State appropriation to colored schools, $4,416; Academic fund, $1,200; Free School fund, $3,214, and receipts for use of books, $16,000, making the total receipts from all sources $147,889.16, leaving a margin of but $2,000 for all other purposes, after deducting the running expenses. In this Statement of resources the receipts for the use of books are estimated, as this source of income is entirely controlled by the local boards of trustees. Although as old as the schools the fee system as conducted by some boards of trustees is causing considerable dissatisfaction throughout the county. Many trustees perform this duty conscientiously and give permits to those only whose circumstances demand this relief, while others are careless or indifferent and sign without discrimination on the recommendation of the teacher, who is interested to the extent of being the agent of the Board for the collection of book fees. At the end of each term the amount is credited on the teacher's report and deducted from his salary. This evil has grown to such an extent that several schools have almost reached a period when they are free to all. By careful inspection on the part of those who have the matter in charge it is believed several thousand dollars might be added to the school resources annually.

During the year the old schedule of teachers' salaries was referred to a committee, consisting of Messrs. Jenifer, Keech and Swift, for revision. This schedule was adopted in 1868 when the schools was small and there were but few assistants. It had been patched several times on account of the schools increasing in number and size, and many complaints were made against its inequalities in the distribution of salaries. To remedy

this fault, but not to increase or diminish the aggregate amount of salaries, the Board determined to take the matter in hand. The new schedule will not go into effect until September 1st, 1882, the beginning of the next scholastic year. Under its scale some teachers may receive more and others less than under the old, but it has the merit of being uniform in its graduations, and, other things being equal, will not materially change the sum total heretofore paid to teachers.

THOS. C. BRUFF,
Examiner.

CALVERT COUNTY.

JOHN W. SHEMWELL, *Prest.* JAMES B. DUKE, *Sec'y.*

Professor M. A. Newell,

SIR: The Annual Report of the Public Schools of Calvert County, is herewith respectfully submitted.

I am pleased to state that our schools are in good condition, and our teachers attentive and faithful in the discharge of their duties. We have met with serious losses within the last three years, but owing to the excellent management of our school interest, extending through all the years since the establishment of the present system, we have been able to meet unusual expenses without embarrassment, and our exhibit shows a good balance yet in our favor. We have lost by fire, within three years, two houses with their furniture. These were promptly replaced and furnished—all in good style. During the year just closed, we have built three other new houses, roomy and substantial, and enlarged three, and placed in them new furniture. One school had grown so large that we had to build a double house and give it an assistant. Our office was also destroyed in the Prince Frederick fire of March 3, by which we lost all our papers and some books. For our ability to meet promptly these unusual expenses, and at the same time keep up without the least abatement, our ordinary outlay, we owe a deep debt of gratitude to our School Boards, past and present, who have so unselfishly given their time, and so scrupulously handled the School Funds.

Our teachers are promptly paid at the close of each term, as well as all other claims against the Board.

JAS. B. DUKE,
Secretary.

CAROLINE COUNTY.

JNO. F. DAWSON, *Pres.* JAMES SWANN, *Sec.*

Professor M. A. Newell,

SIR: We send you our annual report for the fiscal year ending September 30, 1882. The different tabulated statements show nearly all that is of interest; we, therefore, have but little to add.

Through the liberality of our County Commissioners, and the economy of our Board, the schools, for the first time in nine years, have been kept open four terms, less two weeks. We believe the general condition of the schools is as good now as it ever was, and, indeed, we are inclined to believe them in a better condition than ever before. We congratulate ourselves in the belief, that many of our teachers are wide awake to the importance of the work in which they are engaged. We regret that the salaries have been and are still so small, but we have hope that ere long, all will be convinced that, to insure good and efficient teachers, we must pay better salaries, and to do this, we must ask for more money.

We were unfortunate in getting one house burned, which had been built less than a year, and our colored school house in Greensboro had the roof burned, and the house so badly damaged that it is almost worthless. We now have all the school property insured.

JAMES SWANN,
Secretary.

CAROLINE COUNTY—SUMMARY OF SCHOOL STATISTICS.

For Year Ending June 30th, 1882.

	1881.	1882.

CARROLL COUNTY.

WILLIAM REESE, *Prest.* JOSEPH M. NEWSON, *Sec'y, &c.*

Professor M. A. Newell,

SIR: In dispatching to you the Annual Report of the operations of the Public Schools in Carroll County during the past year, we have a few explanatory remarks to make, though we think that the accompanying tables will be found to be sufficiently explicit.

In examining the items of disbursments herewith presented, you will observe that, for building school houses, although we do not credit ourselves with any additional buildings, we have paid in the years here reported the sum of $858.96. This sum is composed of two items, one of $608.96 and the other, of $250.00; the first to liquidate a balance due the year before, but not then ascertained with any degree of exactness, on the new building containing three fine rooms, at Taneytown, the whole cost of which was $2,408.96, and the last, applied to a new school house at Freedom, just now commencing, which important location during all the time of the service of the present members of the Board, and long before, has drawn from the school fund an annual rent of $40 for a house, to accommodate the well conducted school at that place, nearly enough, in all, to have erected a house sufficient for all requirements.

A glance at the tables will impress you with the belief that the public schools in Carroll County have been uniformly, if slowly, progressing in the *direction*, at least, of ultimate success; yet, it must be admitted, vast room for improvement still exists, owing chiefly to inadequate funds to provide and furnish some additional and highly

necessary school houses, and to pay salaries to teachers commensurate with their acknowledged merits.

It is manifest to all who are actively engaged in the administration of the school law in Carroll County, and who have thus become conversant with its simple wants, that if gentlemen who seek legislative honors would stop to consider the questions which, in *apparently* unimportant particulars, most vitally affect the highest success of the public school system, which has now become firmly established in the hearts of the people of all parties in Maryland, much might be done in a single session by a few slight judicious amendments, without making any important changes in our almost perfect school law, to remove all the elements of discord which are now improperly made to appear to be the causes of dissatisfaction. Until legislators, then, instead of preparing their minds to pull down, or to change existing provisions which apply to mere agencies and the methods of their organizations, shall understandingly "*let well-enough alone*," and shall apply themselves to the work of amending and improving, building-up instead of abolishing and changing, pulling-down, mere for the sake of change, or to suit the peculiar views and, perhaps, the interests of certain manipulators, who care little, perhaps nothing, for the schools separate from an inclination to use the subject to promote themselves, their friends, or certain interests in this or that direction—it is useless to repeat suggestions so often ineffectually urged by the school agencies in this office.

Repeatedly, on former occasions, we urged that, among the chief obstacles to full success in Carroll County—and now we may urge the same more strongly than ever—are the want of sufficient funds to build school-houses and pay remunerating salaries to teachers;—the two separate and inconsistent methods, which are impossible to administer with exact justice, of requiring pupils to pay a book fee, or to buy their own supplies of books, stationery, &c., which ought to be as *free* as the schools;—and

the appointment of *three* irresponsible school trustees, who if they ever interest themselves at all, not unfrequently work, each by himself, often in opposite directions, instead of the appointment of *one* good school trustee adequately remunerated, if he shall demand it, for whatever useful service he shall be required to perform, and thus be made responsible through the settlement of his accounts, which can scarcely ever be more than a trifle. If, then, Legislation in this direction, for the school-room to aid the teacher, be attempted, and the Legislature will understandingly turn its attention to defects which are, in a higher or lower degree, admitted by all, and which directly and injuriously affect the internal work of the schools,—the *feet*, if it may be so termed, on which the system ought gracefully to *run*, and will cease to aim destructive thrusts at the more vital part,—the *head*, including the so much admired Normal School, which moves along as beneficially as prosperously, and not at mere methods of constituting agencies, such as Boards of School Commissioners, for instance, which, as they now exist, have thus far given entire satisfaction, with which nobody finds fault, and which cannot one way or another, directly affect the work of the school-room;—if the Legislature will let the *vital* parts of the school law alone, to become symmetrical by their own vigorous growth, as they are now doing so remarkably well, and will only aim to help the hard-working teachers, who only need help in the field wherein all the useful labor lies—in their school-rooms and in their own precarious living;—all the needful amendments that the harmony and the effciency of the schools require, may speedily and simply be enacted without creating a ripple of dissatisfaction anywhere.

We deeply regret to have to report that, owing to the want of funds above referred to, the School Board has been under the painful necessity of withdrawing from service;—reducing the time of the school year commencing September 4th, 1882, to *two*, instead of *three* terms

a year, as hitherto, by which we would have been deprived of the "April installment of the State School Tax;" or of fixing at a lower rate, the salaries of our already poorly compensated, but highly meritorious teachers:—and the latter course was reluctantly adopted.

This unavoidable but necessary retrenchment gives occasion for commendation on the one hand, and for unfavorable criticism on the other, as we knew it would be likely to do, of course, and consequently, the members of the School Board, with every desire to be liberal as well as just, have silently had to endure unmerited reproach without the opportunity properly to repel it; whereas, the injustice of it, if it be unjust, should apply to their unfortunate position, and not to their *enforced* action in it.

By referring to the column in the table, showing the "value of School Property," it will be seen that a sum has been placed opposite each school in said column, but this, in most cases, is necessarily only an estimate, and it must be so regarded; yet we believe that it is, perhaps a fair approximation to the true value.

The column to show the "Cost of Books," has not been filled in detail, because it could not be done with any near approach to exactness. In some sections of the county, the largest number of pupils in the schools claim their *legal* right to buy their own supplies and thus to free themselves from the payment of the objectionable and unpopular book fees, while in the other sections many pupils, on the other hand,—here much the largest numbers—claim *their* right, which is also *legal*, to the free use of boods, &c., by paying a *book-fee* therefor; and in the schools all over the county, some pupils prefer one way of getting supplies, and some another, which gives to the teachers much trouble and annoyance, as well as uncertainty in their reports of the cost of books, especially since "second-hand" books, as they call them, which had been in use in one school, are often afterwards sent to another and charged again.

All these vexations and uncertainties might be avoided by a little amendment to the law requiring uniformity in these respects. But our Assistant Secretary's accounts clearly show what supplies have been sent to each school, and the accounts in this office, showing the payments for this purpose, have been carefully kept; so that an examination, which can conveniently be made at any time, will enable any one to see that the closest economy is observed in this department, our table clearly exhibiting the exact receipts and disbursmements for this purpose.

At the close of each school term, when our teachers are always promptly paid, we have regular and lively assemblies of County Teachers' Associations tolerably well attended; and, of late years, immediately preceding the fall opening of the schools, we have through your kind co-operation, the County Teachers' Institute, the latter, with a good attendance this year, having continued in session "five days," as the law directs. These meetings of the Association and of the Institute, are now regarded as essential elements, and the effects of them are generally thought to be highly beneficial.

It will not escape your notice that the number of official visits to the schools by the Examiners, has been much less in this, than in some former years. This is not attributable to a want of zeal, but to the excessively inclement weather, and the impassable condition of the roads during that part of the year appropriated to this kind of work.

Much of what has been here said is, perhaps unnecessary, because our tables are full enough to exhibit the items to show with sufficient exactness all our receipts and disbursements, and our present condition, from which our future prospects, our hope, and even our fears, may be inferred; but, having the blank space before us, we have written this much, all, or any part of which, may be omitted or thrown into the waste-basket, should you think it entirely superfluous.

JOSEPH M. NEWSON,
Secretary.

Taneytown Ground-Rents	$ 758 69
Balance on Judgments, about	968 73
Bank Stock managed by State Comptroller	7,150 00
Total	$8,877 42

DEBT.—On several occasions, to enable the Treasurer to pay the teachers when their salaries became due, as is the custom in Carroll Co., it became necessary for the School Commissioners to augment their available funds by having their notes discounted in bank. A result of this is, that one of their notes remains yet unpaid; and, consequently, we have to report the Board to be temporarily in debt to the extent of $1,000.00.

CECIL COUNTY.

Professor M. A. Newell,
Secretary of State Board of Education:

SIR: In transmitting to you the report of the Schools of this County for the present year, we have little to add to what is embodied in the report itself.

The number of different pupils is somewhat less than in 1881, but the average attendance has increased. The Schools have been kept open the full term of ten months; and we have built two new School-houses, and three more are in process of erection and will soon be finished.

We have only to add that we think the condition of the Schools is improving, not only in houses, furniture, and appliances, but in their whole management by the teachers.

JOHN SQUIER,
Secretary.

CHARLES COUNTY.

Professor M. A. Newell,

SIR: I herewith respectfully submit the report of "Charles County Public Schools" for the year ending September 30, 1882. It is needless for me to make any comments on what is contained in the "Statistical Report," as I have already, in my last year's report, commented on what appears to me to be the most salient point in both reports, viz: The want of regular attendance on the part of the pupils; and as a good deal of the fault rests upon parents and patrons, I know of no way to reach them, except by bringing their dereliction in this respect to their notice whenever occasion offers. This I have done several times in the public prints of the county. During the month of December (or January) we lost another of our school-houses by fire, making the third so destroyed during the last four years. This fire was supposed to have been the act of an incendiary, as a building that the school authorities immediately secured for the use of the school, was burnt within a few days after being occupied as a school-house. Parties living in the neighborhood made diligent efforts to find a clue that might lead to the discovery of the crime, but without any success.

We have built a new house in the place of this one and also in the place of another which was burnt about the same time the year before.

Everything has worked smoothly and harmoniously with us during the past year, to the great satisfaction of our county school authorities. I have nothing further to offer but our good wishes for a like satisfactory termination of your scholastic labors for the year.

A. W. NEALE,
Examiner.

GARRETT COUNTY.

Professor M. A. Newell,
Secretary of State Board of Education.

DEAR SIR:—The ninth annual report of the Public Schools in Garrett County, is herewith respectfully submitted.

That educational facilities might be enjoyed by as many as possible in the county, the Board has found it necessary to create from time to time new school districts, until our schools now number eighty-five. In many instances the old buildings used for school purposes have been replaced by new and more commodious ones. These demands upon the Board have not been met by any increase on the part of the County Commissioners of the annual appropriation for Public Schools, and in view of the very liberal amounts appropriated by the county for educational purposes, it is hardly to be expected that more can be obtained.

It was hoped, that the people of this county would see fit to adopt the bill funding their school debt, thereby relieving the Board of an annual item of twelve or thirteen hundred dollars interest. At the late election on the 7th of November, this measure was defeated. There appears to be no way of paying off this debt, except by confining the schools to present number, and perhaps cutting short by a month or six weeks the time schools shall be kept open. By this means, in two years the debt can be paid, or so materially reduced, that the item of interest will not make so heavy a demand upon our funds.

In 1879 the county levy for schools was $10,000.00. Of this amount the tax-collector paid to the Treasurer of the

School Board the sum of $4,516.92, and a judgment for balance with interest is now held against the tax-collector for that year. From this source was received during the past year (as reported) one thousand dollars.

The enrollment and average attendance as compared with the year ending Sept. 30th, 1881, shows a decrease. This arose from an effort to carry out the law in regard to vaccination. Some few still remain opposed to having their children vaccinated, but this feeling is fast giving away, and but little difficulty is anticipated during the current scholastic year. The item for building, refers to school houses reported Sept. 30th, 1881, but not fully paid for. Very Respectfully, Yours,

E. H. BARTLETT,
Secretary.

HARFORD COUNTY.

ARTHUR VOSBURY, *President*. NOBLE L. MITCHELL, *Secretary*.

Professor M. A. Newell,

DEAR SIR:—The annual report of the schools of Harford county is respectfully submitted. The canning industry, which has assumed such large proportions in our county, has interfered very seriously with our schools, especially during the fall term. Many schools do not open until the middle of October in order to allow the children, who are engaged in the canning houses, the benefit of attending school in the spring, but even then they are kept at home to assist in the planting of the spring crops. If this industry grows within the next year as it has done in the past, the propriety of giving those districts but three school terms will be considered, for it seems to be almost useless to pay a teacher to do comparatively nothing.

Our display at the last Agricultural Fair, while it was not as large as formerly, was in every way a creditable one and called forth great praise from all who examined it.

The School Board, last spring, urged upon the County Commmissioners the necessity of a larger levy to keep our corps of teachers together and to run our schools with more vigor, but were unable to secure an advance over last year. A sufficient sum of money was levied, however, to build three new district houses and to complete a new school building for Bel Air with a capacity of seating two hundred pupils, and at this time all the district houses have been finished and the one in Bel Air is rapidly approaching completion, and we hope to occupy it by the first of the new year.

Yours, very truly,

NOBLE L. MITCHELL,

Secretary.

HOWARD COUNTY.

JAS. T. WILLIAMS, *President.* JNO. G. ROGERS, *Secretary.*

Professor M. A. Newell,

DEAR SIR:—The Annual Report of the Public Schools of Howard County, for the year ending Sept. 30th, 1882, is herewith respectfully submitted.

I am pleased to show by my report a balance on hand after having liquidated our current indebtedness and paid off the debt which we have been carrying for several years, which is "a consummation devoutly to be wished."

The Teachers' Association convenes regularly, and is, I am confident, productive of great good; the enrollment and average attendance show a slight falling off from last year. Epidemics were prevalent in some portions of the county.

We have adopted the graded system and require its observance strictly, and find it materially diminishes the labors of the teachers and systematizes the general working of the schools.

We have entered upon the new year with every indication of a year of prosperity and feel assured that our enrollment and attendance will reach the usual standing.

Respectfully submitted,

JNO. G. ROGERS,
Secretary.

KENT COUNTY.

R. W. JONES, *President.* EBEN F. PERKINS, *Secretary.*

Professor M. A. Newell,
Secretary of State Board of Education:

We have nothing special to communicate outside of the tables of statistics, which are full.

The new apportionment of the State tax, under the census of 1880, has reduced our proportion, both for white and colored schools.

The County Commissioners generously came to the relief of our white schools, and increased the county tax sufficiently to make up the deficiency. The diminished amount received for the colored schools will render it necessary, in the future, to close some of these schools during two terms of the year. This will not, however, work very material injury, as the colored schools are very poorly attended during the fall and summer terms; the parents of these children being unable to dispense with their labor during the busy seasons.

Our schools are increasing in usefulness; and the average attendance is steadily increasing.

A Teachers' County Association meets regularly every term, and has proved a most useful part of our system.

EBEN F. PERKINS,
Secretary.

KENT COUNTY.—SUMMARY OF SCHOOL STATISTICS.

MONTGOMERY COUNTY.

A. B DAVIS, *President.* S. R. WHITE, *Secretary.*

Professor M. A. Newell,

DEAR SIR:—In making this report the Board is gratified to say that it is free from all indebtedness, and that the salaries of teachers and the expenses of the schools have been promptly paid at the close of the respective terms, the past fiscal year.

As stated in the outset of this Board's administration, the schools will be kept open as long as the funds from State and county will furnish without incurring any indebtedness, and no longer.

For the year ended June 30th, 1882, the schools were open 9 1-3 months—and for the year ending June. 1883, it is proposed to keep them open 9 months if possible—the prospects are flattering, and the Board believes the general interest in the schools largely on the increase—the people seem to be more alive and more interested than ever before in the success of the schools in this county.

The Teachers' Institute made a good impression upon our citizens, and it is to be hoped the Institute may be held annually.

The Teachers' Association is succeeding well, and bids fair to be quite an auxilliary to the cause of education in the county.

For further information you are referred to the Report herewith respectfully submitted.

With respect,

S. R. WHITE,
Secretary.

PRINCE GEORGE'S COUNTY.

DR. W. W. DUVALL, *President.* T. S. STONE, *Secretary.*

Professor M. A. Newell,

DEAR SIR:—We to-day mail you the annual report of the Public Schools of Prince George's County for the year 1882.

We assert with pleasure that, in our estimation at least, the schools of our county have done better work during the past year than ever before; our teachers manifesting more interest in their schools and showing greater improvement in their methods of teaching.

We are inclined to think the improvement so perceptible in the schools of this county, will be shown to be generally true of the schools of the State; it being the natural result of a good system at least fairly administered.

Our county is now perhaps one of the best provided in the State with comfortable school houses and good furniture. We have now in use only one house that is unfit for school purposes.

During the past year seven school houses have been built and two remodeled. Every school building in the county is now provided with patent desks, black-boards, and other necessary school furniture.

A lot has been purchased and initiatory steps taken towards building a house in the town of Laurel for the large graded school of that place, at present held in a rented building

Our financial condition is still good; we are free of debt with a small cash balance to our credit, the county

still being indebted to its schools in the sum of five thousand dollars.

The accompanying tables have been carefully filled out, and, so far as we can see, need no explanation ; but should any additional information be desired, it will be cheerfully furnished at any time.

The footings of the two columns, "Cost of Books and Receipts from Books," show but slight difference. This is the result of our method of handling books—the difference only occurring where books have been given to indigent children.

All of which is respectfully submitted.

T. S. STONE,
Secretary.

QUEEN ANNE COUNTY.

CENTREVILLE, Queen Anne Co., Oct. 20, 1882.

Professor M. A. Newell,

DEAR SIR:—My report has been delayed longer than usual this year from circumstances that I could not control. You will see by the information furnished in the tables of statistics that we have not lost anything, but gained slightly over the last year. I have every reason to believe that a great deal of sickness among the scholars caused the average attendance to be much less than it would have been under more favorable circumstances. The great falling off in the attendance of scholars in School No. 2, Election District No. 2, convinced the Board of the propriety of closing that school, which they have done. They have two schools, (one of them a graded school,) near enough for convenient access to the few scholars that attended No. 2, and they can be accommodated. We have built two new houses and enlarged two others, until they are nearly new, and they would be taken to be new by any one not knowing the contrary.

We have the means secured to keep the schools open as usual during the whole year. Our Colored Schools are prospering. For many years the churches belonging to the colored people were used as school rooms and they had no others. They have now seven houses, (nearly half the number of schools,) devoted to school purposes alone, and the prospects are very good for an increase during the current year. We have had again to mourn the loss of one of our teachers, as we did in 1881, Miss

Mollie Bailey, an estimable young lady and popular teacher, a former student of the Normal School and well known to you. This adds another to the list of five or six who preceded her. The teachers occasionally die, but the scholars go on.

Wishing you a pleasant and successful year, I remain,

Very truly, your friend,

JAMES W. THOMPSON,

Examiner of Queen Anne County.

ST. MARY'S COUNTY.

Professor M. A. Newell, Secretary.

SIR:—I have the honor herewith to transmit my report for the year ending, September 30th, 1882.

While I cannot but feel that a better state of things should exist than is disclosed by this report, yet I am vastly encouraged in comparing our condition as it now is, with what it was six or seven years ago. Better facilities for teaching, better qualified teachers, and increased interest on the part of pupils and patrons alike—these indicate advance in no slight degree. Good school houses and the very best school furniture, have in great part supplanted the miserable huts and the still more miserable furnishing that stood in the way of educational advance, and with which patrons, teachers and pupils seemed so far satisfied that they took no step to better their surroundings in this particular.

We have now forty-one school districts for the white children, in the place of the thirty-six in operation some years since, and seventeen of these districts are now provided with new, well-built and commodious houses, supplied with proper furniture. These have been built and furnished at an expense of something over $10,000. Many of the old houses have been well furnished, and have been, in part, repaired, but nothing can be done with them to fit them for the purpose to which they have been applied. New and properly constructed houses are absolutely necessary to replace nearly all the old ones. Fortunately, the amount of our appropriations, would seem, if properly husbanded, to be ample for the purpose, and it is to be hoped that we may soon see the last of the old style of buildings that have stood as a blot

upon our civilization in being recognized as fit for educational uses. Two of the new houses are constructed to accommodate a large attendance and in most particulars may take rank as high schools—indeed, at quite a number of our schools we offer the opportunity of obtaining a very fair English education, quite enough for the needs of the great majority.

Our teachers, as a body, are better qualified than formerly for their work, and seem more earnest and devoted in the discharge of their duties.

The patrons of our schools are, to a large degree, aroused to a fuller appreciation of the educational advantages held out for their acceptance in behalf of their children, and to the necessity of procuring properly qualified teachers.

What I have said above applies more particularly to the white schools. While every effort has been made to assure the advance of the colored schools, success has not been attained to such degree as all admit to have been reached with the white schools. Scarcity of money, the difficulty of obtaining competent teachers, the apathy and dense ignorance of the adult colored population, together with unfortunate political complications and prejudices, have stood in the way.

Still, a marked advance has been made, and some of their schools will compare quite favorably with some of the white schools that rank among the best.

Our financial status still remains good. We do not owe a dollar; are always prepared to meet our obligations promptly, and pay our teachers at the close of every term what may be due them, never paying in orders or giving promises to pay.

Very respectfully,

GEO. THOMAS,
Secretary.

ST. MARY'S CO.—*Summary of School Statistics.—Continued.*

SCHOOL HOUSES BUILT OR ENLARGED DURING THE YEAR.

No. of Schools.	District.	Brick or Frame.	Cost.	Length.	Width.	Height.	Out-Buildings, Yes or No.	Cost of Furniture.
*1	1	Frame.	$300 00	32 feet	20 feet	14 feet	No.	Not furnished.
†1	2	"	500 00	"	"	"		$75 00
‡*4	2	"	300 00	"	"	"		Not furnished.
†5	3	"	500 00	"	"	"		$75 00
*2	6	"	300 00	"	"	"		Not furnished.
‡3	7	"	400 00	30 feet	"	"		"
2	4	"	558 00	32 feet	20 feet	14 feet		Not furnished.

*These houses are not finished, and the prices annexed only indicate the amounts actually paid out at close of financial year. They will cost from $450 to $550 each.

†These houses cost by contract $500 each. The cost of the hauling and painting, both done by the Board, will add a little over $80 to the cost of each house.

‡This is an addition to No. 3, 4th E. D., rendered necessary by the large increase in the No. of pupils—two teachers and another room being needed.

SOMERSET COUNTY.

Professor M. A. Newell,

DEAR SIR:—I have the honor herewith to submit to you the annual report of the Board of School Commissioners for Somerset County. Our Schools were continued eight months only, which, as the small balance left in the treasury at the close of the year plainly shows, was all we were able to do.

We have built two new School-houses, one for white and the other for colored children. Another house is under construction, at an estimated cost of twelve hundred dollars or more, to be used as a grammar school.

The standard of our teachers is steadily improving, which we owe in a great measure to the Normal School, together with St. John's and Western Maryland Colleges.

We have still much difficulty in procuring properly qualified teachers for the colored schools; but even here there is a great improvement over former years.

Very respectfully, yours,

SAM. H. ROBERTSON,

Secretary.

TALBOT COUNTY.

HENRY P. HOPKINS, *President.* ALEX. CHAPLAIN, *Secretary.*

Professor M. A. Newell,
Secretary State Board of Education.

DEAR SIR:—In compliance with the requirements of law, I have the honor to submit herewith the annual report of the Board of County School Commissioners, of Talbot county, for the scholastic year ending June 30th, 1882, and the fiscal year ending September 30th, 1882.

We have expended during the year for building new school houses, exclusive of furniture, $3,101.00; and we have contracted for three more houses which will be ready for occupancy in the month of December. We have made improvements, every year, both in regard to external appearance and the internal arrangement of our school houses. We have been quite successful in devising means, at a very moderate cost, for heating and ventilating our school rooms with some degree of thoroughness. With an ordinary coal stove, we have succeeded, by a very simple contrivance, in heating school rooms more by convection than by radiation. We have studied to meet, in this connection, the requirements of a school room: an equal distribution of heat, a constant supply of fresh air, and economy so far as the use of fuel is concerned.

A painful disease of the eyes prevented me from superintending the school work of the county very closely. It was, indeed, with faithful effort, at times, that I could even perform the clerical duties of the office; and, at one time, I thought it would be necessary for me to resign.

There is still a great deal of loose and imperfect grad-

ing, especially in our country schools, where a want of co-operation, on the part of parents, and the irregular attendance of pupils constantly present to the teacher the problem: "How can I keep my school graded?" It requires, perhaps, more judgment and tact to keep a school graded than it does to grade one; but, by earnest effort, our teachers can overcome most of the difficulties in the way. Teachers must cultivate a better understanding and more cordial relations with the parents of their pupils, and they must get the children interested, too, before they can succeed well in grading their schools and keeping them graded.

The finances of the Board are in a very satisfactory condition. The balance due and to the credit of the Colored School Fund, at the close of the fiscal year, was $1,042.30; and the available assets of the Board were, cash on hand, $824.82, and amount due from county levy, judgment, &c., exclusive of interest, $3,919.34, leaving a surplus fund of $3,701.86 for white schools, and $1,014.30 for colored schools.

With many thanks for your counsel and encouragement during the year, I remain, very respectfully,

Your obedient servant,

ALEXANDER CHAPLAIN,

Secretary.

WASHINGTON COUNTY.

WM. RAGAN, *President.* P. A. WITMER, *Secretary.*

Professor M. A. Newell,

DEAR SIR:—We submit herewith the annual Report of the Public Schools of Washington County. The enrolment of pupils for the year just ended was slightly in excess of that for the previous year, and the average attendance was considerably increased.

It will be found upon examination and comparison that the aggregate expenditures for the support of the schools are considerably less than for any year since 1870.

This is, no doubt, a gratifying fact to tax-payers, but we think our schools could be improved if the people would consent to a higher schedule for salaries.

The average cost per different pupils per term is $2.05, and of each pupil in average attendance about $6.00 per term. This, we think, is reaching the minimum of expense, and in this aspect of the case the Board feels that it is meeting the universal public demand for economy in the administration of public affairs.

Our High School continues to do excellent work and meet with general approbation. The average attendance throughout the year has exceeded forty, and yet the expenses, as will be seen by reference to the statistics, have not reached, including all incidentals, the sum of six hundred dollars.

Of the fourteen pupils who graduated in June last, eight have entered different colleges and universities, either Freshmen or Sophomores.

No special incidents of importance have marked the progress of our schools during the past year, and it is a gratifying indication of public satisfaction, that during the late animated political contest in this county, the management of the schools did not enter into the public discussions of the respective parties.

Respectfully submitted,

P. A. WITMER, *Secretary.*

WICOMICO COUNTY.

F. C. TODD, *President.* THOS. PERRY, *Secretary*

Professor M. A. Newell,
Secretary of the State Board of Education.

DEAR SIR:—Herewith is transmitted the annual report of our Schools. There is but little that claims the special attention of the public beyond that shown by the statistics. There are some things to which we wish to call the attention of our own people, but have thought best to do this when we make our statement of receipts and disbursements for publication in our local papers.

We have just completed a new Union School building in Salisbury at an expense of over four thousand dollars. Many other buildings are needed to afford actual comforts. In the distribution under the census of 1880, we are cut short nearly seventeen hundred dollars a year. I can't see now how we will supply this deficiency.

In giving the numbers in the various grades, I unintentionally wrote Winter Term Enrollment, instead of Fall Term as used heretofore; hence the great difference between the figures of 1881 and 1882.

Very respectfully submitted,

THOS. PERRY,
Secretary.
